

DELTA FUEL MANAGEMENT SYSTEM

The Delta Service Station app/portal is designed and fully integrated to solve a challenge in the consumer's life around fueling needs.

Enjoy Our Products and Services, Earn and Redeem Points.

Fueling your vehicle may be an expense to you but with our app we can reduce the cost of that. Knowledge is power, but only if it is used correctly. Galana Oil Kenya Limited does this by providing a diverse, effective and efficient, user-friendly app that allows users to manage their fuel consumptions. This is a mobile application that is available free of charge on your mobile device.

With a few simple steps, you can get registered and start enjoying our services, earn points and redeem points.

- Drive to the nearest Delta Service Station.
- Request for a card/ sticker.
- Provide required information for registration
- Download app from PlayStore /AppStore
- Sign up on the app
- Enjoy our services and products to start earning points and rewards
- Redeem points once they accumulate

Points are awarded every time you visit our station.

Its Features include:

Benefits

- Reduce cost for user.
- Make reporting of fuel consumption easy and convenient.
- Make user concretely master all operations and transactions by monitoring their fuel consumptions and costs for each transaction.
- Easy and real-time access to your transaction reports whenever and wherever.
- Redeem points to enjoy goods and services at discounted rates. You can use your points earned to fuel, purchase lubricants, LPG and other products.

Consumer Solution

Fuel Management System

Delta FMS offers your business an easy to use platform to manage fuel needs of your company. When you partner with us we will provide a free system for your site(s) that will help you manage the site(s) and its fuel requirements, right from drivers, fuel requests and offloading, stock management, asset management, fleet of vehicles and other equipment.

We can also provide your site with storage tanks and pumps.

The key features of the system include:

1. Fleet management

The tool provides an effective way of managing the fuel requirements of your fleet. Your business will be able to monitor the consumption rates of each vehicle and tie the same to assigned jobs. You will be able to ensure that only the designated personnel's are allowed to consume your fuel.

2. Inventory Management

Right from procurement to receiving and dispensing of fuel at your sites, the system provides you with the ease of planning, controlling and monitoring of your fuel at your site. The utility provides you with reorder level alerts and product restrictions per site

3. Fixed Assets Management

The system is integrated with functionalities to monitor all your assets at site e.g. pumps, tanks, vehicles, generators e.t.c. installed at a given site. You can raise and monitor service/maintenance calls for each equipment when needed.

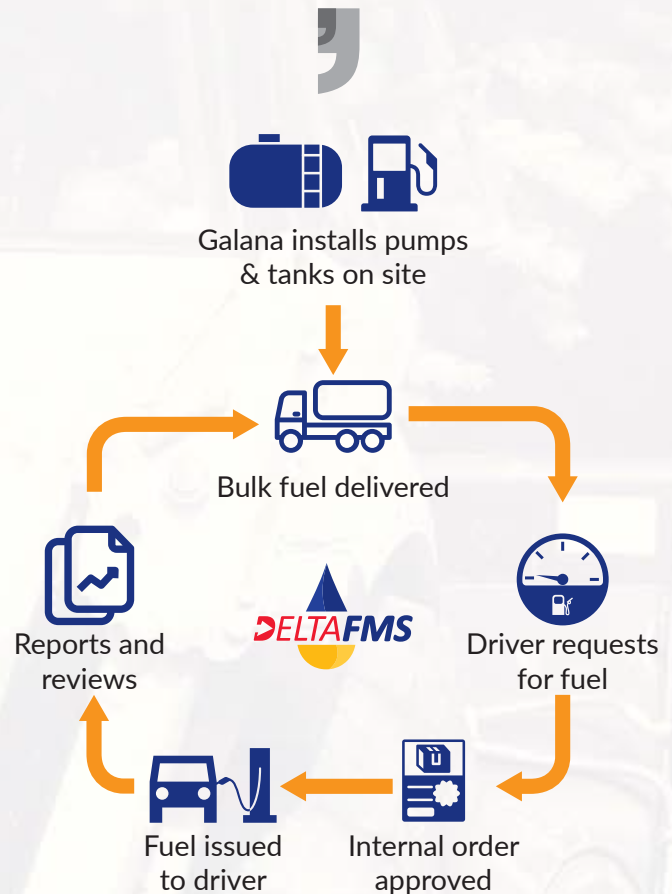

4. Improved Reporting

You get real time and history reports of all your sites activities at a click.

5. Centralized Site Management

With the system you can manage all you sites remotely from the same platform.

Save on fuel expenses with special rebates and discounts at your favourite fueling station, wherever the road takes you!

Benefits to the consumer/commercial

- A rich set of real time and history reports that cover all aspects of site operations
- Inventory management of fuel & dry items with re-order levels alerts. Helps to track and minimize losses.
- Ease ordering of fuel, manage and control dispensing of fuel.
- Manages all aspect of the site: Users, customers, products and Attendants
- Asset Management; keeps a record of all assets at the site
- Centralized management and visibility of all sites.

CLOUD BASED FUEL MANAGEMENT SYSTEM
